

EVAPORATIVE COOLER QUICK START GUIDE

EC220W

Before You Start

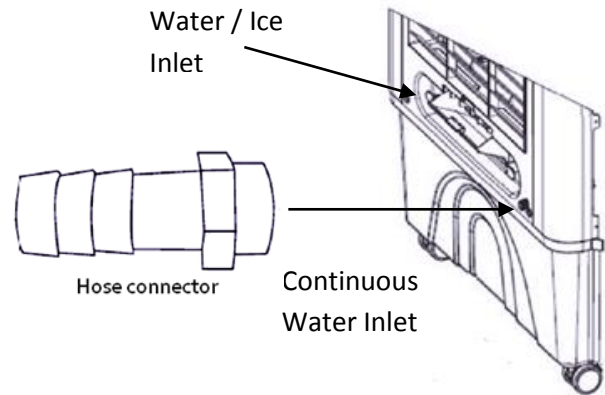

1. Check to ensure that all parts are included:
 - a. Evaporative cooler
 - b. Hose connector
 - c. PVC pipe
 - d. Owner's manual
2. Place cooler on firm, level surface.
3. Before operation, clean the water tank with a solution of warm water and light detergent.
4. For continuous operation, install the hose connector to the inlet on the back of the cooler and connect to a standard garden hose using the supplied PVC pipe.

NOTICE: The evaporative cooling function of this unit is optimized to work in hot and dry climates. Excessive humidity (higher than 60%) will reduce the cooling effectiveness of any evaporative cooler. Allow ample ventilation in the location of the evaporative cooler to ensure proper operation.

For full operation and safety information, please read the owner's manual that accompanies this product. For further assistance, contact Luma Comfort at 1-866-737-6390 or visit our website at www.LumaComfort.com.

Basic Operation

1. Fill the water tank through the water inlet.
2. Connect to a power supply and turn the SPEED dial to begin fan operation.
3. Turn the COOLER dial to the "ON" position to begin cooling.
